SUSTAINABLE PRIVACY SCREENS

BLINDS MADE FROM OCEAN PLASTICS

The team at Solarglide care about the environment and the Global Maritime Industry which we serve, it's part of our company culture. We have made significant changes here at Solarglide, the first step was to improve our product packaging and internal processes. We did by swapping out plastics for recycled and biodegradable packaging materials.

Let us tell you about Solarglide's amazing, sustainable privacy dimout blinds; the main feature is that they're made from 100% recycled ocean plastics. (Those plastics found at the bottom of the ocean and recovered from the sea). The fabric used in our sustainable privacy screens prevent abandoned plastics from further polluting our oceans and avoids them going back into landfill sites.

The ocean plastics are sorted, shredded, and melted into pellets before being processed and knitted together. Once dried out, the fabric is ready to use for blinds production. Amazing right?

The fabric has a 5% openness factor which means that it allows lots of light into the interior space whilst offering moderate shading and privacy. The fabric is flame retardant to DIN4102-B1 and IMO approved; it comes in seven neutral colours including pebble, plaza grey and white. The fabric is robust and wipe clean; it also withstands mould and is suitable for damp interior conditions. Due to its hard-wearing nature this product comes with a 7-year product warranty.

VESSEL TYPE

COMMERCIAL AND MILITARY SHIPS

Solarglide’s sustainable dimout fabric range for commercial ships and military ships consists of 100% recycled ocean plastics. A unique blind that takes old plastics from our oceans and reuses them to make a robust and hard-wearing roller blind fabric for ships, tankers, containerships, and workboats. This product assists ship managers and shipowners on their sustainability journey whilst reducing the volume of plastic floating in our oceans.

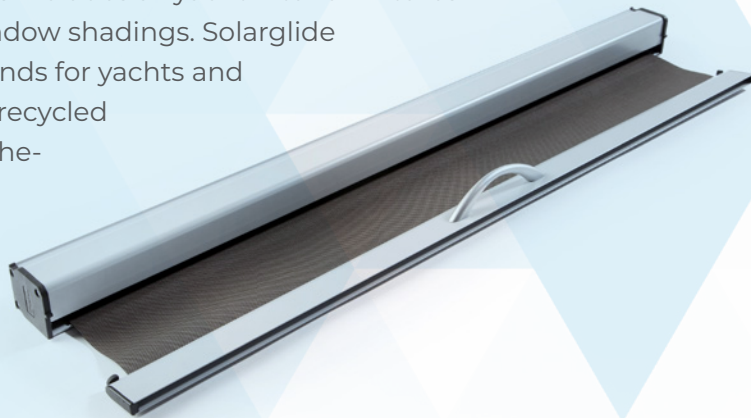

CRUISESHIP AND FERRIES

With approximately 8 million pieces of plastic entering the worlds oceans every day, the Cruise Sector has embraced sustainability with both hands. As a key supplier to the cruise sector, Solarglide’s sustainable dimout blinds for cruiseliners and ferries are the first product in our range to offer recycled fabrics from the oceans.

YACHTS AND SUPERYACHTS

Sustainable yacht building is a hot topic right now and every element is being considered as the global sustainability strategy gains momentum. This includes all yacht interior fixtures such as blinds and window shadings. Solarglide sustainable dimout blinds for yachts and superyachts combine recycled plastics with state-of-the-art solar powered motorisation.

SOLARGLIDE SUSTAINABLE PRIVACY SCREENS

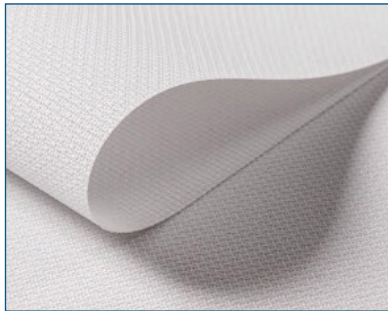

- ✓ SEVEN COLOURS AVAILABLE
- ✓ 100% OCEAN PLASTIC
- ✓ MANUALLY OPERATED OR SOLAR POWERED
- ✓ 100% BIODEGRADABLE PACKAGING
- ✓ IMO FLAME RETARDANT FABRIC
- ✓ MOISTURE RESISTANT AND EASY CLEAN FABRIC RANGE
